ABSTRACT:

PURPOSE: To obtain an immunosuppressant controlling T-cell dependent antibody production, useful for organ transplantation and treating immunopathy and autoimmune diseases.

CONSTITUTION: An immunosuppressant comprises vernodalin of the formula as active ingredient. The compound is obtained by extracting from leaves of Vernonia amygdalina with chloroform or n-hexane-methanol and purifying silica gel chromatography, HPLC, etc. The dose of the compound is properly 0.01-10mg/kg and administered once-three times daily.

 AN 1985-63610 VETU P S
 AB Pregnant Albino mice treated with differential solvent **extracts**
 of fresh leaves of *Veronia amygdalina* (Del) aborted
 when given the methyl alcohol **extract**, died when given the
 chloroform **extract**, and littered normally when given the
aqueous extract.
 ABEX 66 Albino mice 12-13 days pregnant were used, and 5 **extracts**:
 methyl alcohol; acetic acid in **water**; sodium bicarbonate in
water; pure **water**; chloroform. 2 Groups of mice were
 allotted to each **extract** and 1 group to the vehicle control. 1
 Of the 2 groups assigned to each **extract** was given 75 mg and
 the other 150 mg of the **extract** p.o. The mice were dosed for 3
 consecutive days except where death occurred before the 3rd dose. 24
 Hr after the 3rd dose, 46 and 45 aborted fetuses were counted in the
 cages containing the mice which had 75 mg and 150 mg of the methyl
 alcohol **extract** respectively. 1 Mouse in the 75 mg group and 2
 mice in the 150 mg group were dead. Deaths were also recorded and apart
 from the 2 groups which had the chloroform **extract** in which all
 12 mice died within 12 hr after the 1st dose, the surviving mice dosed
 with the other **extracts** and the vehicle littered normally 7-8
 days from the start of the study.
